Commercial Solar Photovoltaic

**Clean Affordable Energy**

# Join the green revolution & increase your profit!

# Solar Pays!

- Solar PV systems can potentially offset all business energy needs
- Generate free electricity & avoid the rising costs of fossil fuels
- Solar power that is generated & remains unused will be returned to the grid
- Reduce your utility bill by hundreds of dollars annually

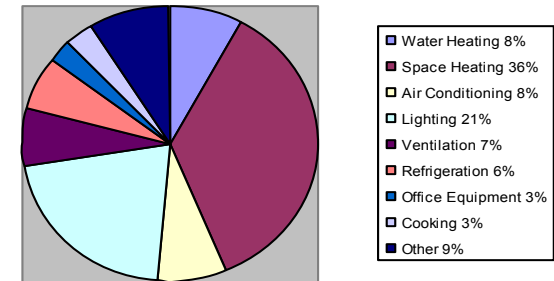

Benefit from a *fast* return on your investment & the freedom of solar power!

- A typical 10kw solar system can abolish 400lbs of Nitrogen Oxide, 1000 lbs of Sulfur Dioxide & over 200 tons of Carbon Dioxide
- Solar power reduces green house gasses, has no harmful byproducts & is *entirely* renewable
- Purchasing a Solar system for your business is like buying a vehicle with an endless supply of fuel

Solar systems qualify for Federal tax incentives valued at 30% of the cost of each system with *no* limits!

Energy Usage in Commercial Buildings

# Save hundreds of dollars annually
