Commercial Solar Thermal

**Clean Affordable Energy**

# Join the green revolution & increase your profit!

# Solar Pays!

- Solar Thermal systems can meet all commercial hot water needs
- Fossil fuel costs will continue to rise while solar power will remain virtually free
- Solar Thermal heaters have twice the life of gas or electric heaters
- Reduce maintenance costs and double length of warranty terms

**100% return on your investment  
in 2 years on average**

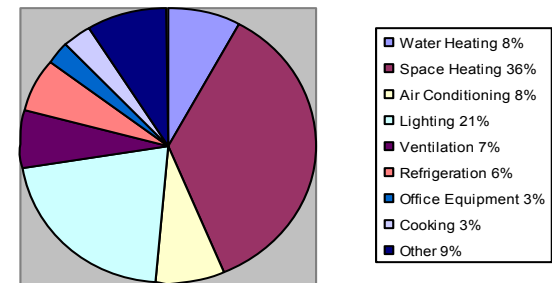

*\*Based on 80 gallon electric heater with \$500  
annual operating cost*

- One solar water heater can reduce CO<sub>2</sub> emissions from 3-10 tons each season which is the equivalent of operating a car for one year
- Reduce dependence on fossil fuels and cut your energy costs
- Purchasing a Solar Thermal water system is like buying a vehicle with an endless supply of fuel

Solar systems qualify for Federal tax incentives valued at 30% of the cost of each system with *no* limits!

Energy Usage in Commercial Buildings

# Save hundreds of dollars annually
