Residential Solar Thermal

Clean Affordable Energy

Join the green revolution & increase your home's value!

Solar Pays!

- Solar Thermal systems can meet all domestic hot water needs
- Fossil fuel costs will continue to rise while solar power will remain virtually free
- Solar Thermal heaters have twice the life of gas or electric heaters
- Solar is a totally tax-free and renewable source of energy

**100% return on your investment
in 2 years on average**

**Based on an 80 gallon electric water heater
with \$500 annual operating cost*

- One solar water heater can reduce CO₂ emissions from 3-10 tons each season which is equivalent to operating a car for one year
- Reduce U.S. dependence on fossil fuels and cut your energy costs
- Purchasing a Solar Thermal water system is like buying a vehicle with an endless supply of fuel

Solar systems qualify for State tax incentives valued at *50% of the cost of each system!
*\$12,500 per system

Solar systems qualify for Federal tax incentives valued at 30% of the cost of each system with *no* limits!

Save hundreds of dollars annually
